---

## About :

Dedicated and motivated Computer Engineering student with a foundation in web development , Java and Data Science . Proficient in the MERN stack, HTML, CSS, Bootstrap ,Tailwind CSS, MongoDB, SQL . And aware about Java and Data Science. Strong critical thinking and collaboration skills with a responsible, empathetic approach to teamwork. Eager to apply technical skills and contribute to realworld projects to kickstart my career and build a strong skill set.

## Projects :

☐ **Expense Tracker** : Individual Project | Duration: July 2024

- Develop a expense-tracker using MERNs stack
- Used beginner-level Node.js and React.js concepts: Async Await, Props, Components, Model, and REST APIs
- as our daily transactions to be noted easiely
- all records of debit and credit transactions.Apply user log
- Project Link: [expensetrackerprojectbysakshi.netlify.app/login](https://expensetrackerprojectbysakshi.netlify.app/login)
- GitHub Link: [github.com/sakshishewale2808/Expense\\_tracker.git](https://github.com/sakshishewale2808/Expense_tracker.git)

☐ **Mini Links** : Group Project | Duration: August 2024

- Develop a Shorten url project using **MERNs** stack
  - Used beginner-level Node.js and React.js concepts: Async Await, Props, Components, Model, and REST APIs
  - URL's are very long, and large amount memory required to stored this links. So instead of writing long URLs. Go through my project
  - Provide the slug and with me create your short url
  - Project Link: <https://shorturlbysakshi.vercel.app/login>
  - GitHub Link: [github.com/sakshishewale2808/shorturl.git](https://github.com/sakshishewale2808/shorturl.git)
- 

## Technical Skills:

1) Webstack technologies:

- HTML , CSS, Bootstrap, JavaScript, React JS, Express JS, MongoDB, Node JS

2) Tools:
